LEADERSHIP QUALITY

The success of any organization is dependent on the quality of leadership. Dynamic and effective leadership is a major segment of the success. Leadership is the focus of activity for achieving set goals. Leadership is an important aspect of managing. As the leader, you must keep your team's mood upbeat and ensure that the activities it pursues are productive. In other words, you must be a motivator. Several ways to keep your team motivated are listed below.

- Be flexible, Listen to complaints and ideas objectively.
- Treat all team members equally and give each one personal attention as required.
- Find ways to recognize and reward good work.
- Provide regular sources of information and feedback.
- Involve everyone, when appropriate, in decision-making.
- Keep the promises you make to all team members.
- Be consistent and act positively, even if you feel negatively.
- Support your institution's policies and procedures.
- Stay calm when under pressure and provide an appropriate role model.
- If possible, provide opportunities for advancement.

- Make sure goals are clearly communicated and understood.
- Praise good performance in public and counsel poor performers privately.

Follow the above mentioned skills and become a successful leader in your field.

- Avoid talking bad about people behind them.

There is no excellent book which will help you to be charming, but, yes there is a perfect book which will help you and guide you to be CHARMING and that is your own MIND.

EFFECTIVE NOTES TAKING

Effective notes taking consists of three steps:

1. Observing
2. Recording
3. Reviewing

First you observe an event-most often a statement by the instructor. Then you record your observations of that event-that is, you take notes. Finally you review what you have recorded.

Observe: To sharpen your class room observation skills, experiment with the following techniques and continue to use those that you find most valuable.

- Be familiar with the assignment and course contents. The more familiar you are with a subject, the better you can observe what happens in the class.
- Sitting up front is a way to commit yourself to getting what you want out of class. When you sit in front you are declaring your willingness to participate actively in teaching learning process in the class.
- Arrive early, and then put your brain in gear by reviewing your notes from the previous class. Review assigned problems and exercises. Note questions you intend to ask.

Record: The format and structure of your notes are more important than how fast you write or

how pretty your hand writing is. The following techniques can improve the quality of your notes:

- Use the Cornell format of note taking.
- Write the notes in outline form.
- Use key words.
- Use pictures and diagrams.
- Copy material from the board.
- Label and date all notes.

Review: Think of reviewing as an integral part of note taking rather than as an added task. If you can review your notes soon after the class or during the class, you can move that information from short term memory to long term memory. You can do it in just a few minutes- often, ten minutes or less. Review your notes within 24 hours, this will help you remember it better and then if you further review it a week later you will remember it for a very long time.
